Milliken GARDENS

ARCADIA, CALIFORNIA

INTRODUCTIONS *for* 1950

EL TIGRITO (C. G. White)

A lovely new tailored plicata with a buffy-yellow ground color heavily veined with brown. The name means "Little Tiger", and is most appropriate. The flowers are not large, but have an individuality and flare which has made this variety very popular in our show room. For arrangements it is most valuable, often adding just the touch desired. 2½ feet. **\$10.00**

FOREST VIOLET (Milliken)

An enchanting deep violet self, warmed and enriched by a brown infusion throughout, even to the violet beard which is heavily brushed with cinnamon. The flowers are medium sized, the standards are closed, and the falls, which are slightly ruffled, flare in an interesting fashion. Exceptionally valuable for cutting. Very fragrant. 3 feet. **\$7.50**

GLENDORETTE (Milliken)

Large heavily ruffled flowers of light citron yellow. The standards arch beautifully and the falls are very large and shaggy. 3 feet. **\$3.50**

MICHILLINDA (Milliken)

A charming plicata with a shell-pink ground color lightly sprinkled with dark rose dots. A golden beard adds a contrast note. It is an exceptionally good performer, the blossoms are large and ruffled, and either in the garden, or as a cut flower, gives a light airy touch. With browns or blues it is breathtaking. 3 feet. **\$7.00**

MONTECITO (Milliken)

A very lovely iris in cool lemon-yellow and frosty-white—truly magnificent in every respect. The closed standards are pale yellow, while the crisp satin-finished falls are yellow with a highlight of white on the mid-section. The blending of the white and yellow is a work of art—even the beard is white at the tip, and as the color deepens into the throat the beard picks up the pale yellow coloring. The falls are extra large and slightly wavy. An iris you will treasure. 3 to 4 feet tall. **\$15.00**

SPRING SERENADE (Milliken)

This lovely iris in translucent old ivory is as perfectly finished as a piece of Dresden. Both the standards and falls have rigid ribbing which holds the delicately ruffled and fluted porcelain-like petals in a perfect arch, giving a global appearance. We have no other iris like this lovely newcomer. 3 feet. **\$10.00**

TRAIL BLAZER (Milliken)

We are proud of Trail Blazer. As the name implies, it is a fiery red-mulberry purple, shot with blue at the tip of the beard which spreads over the central portion of the falls creating a startlingly brilliant color effect. A touch of deep ruby red flanks the cinnamon beard and adds depth and richness to the flower. The standards arch and are closed, while the falls are shaggy and slightly ruffled. A most interesting flower. 3½ to 4 feet. **\$15.00**

VENETIAN RED (Milliken)

A smooth Venetian red self, enriched by a light brown overlay which gives an antique red of unusual beauty. The flowers are medium sized and nicely ruffled. A lovely cinnamon beard gives the final finishing touch to this attractive flower. 3 feet. **\$10.00**

A CORDIAL INVITATION is extended to you to visit our gardens at any time of the year. Our "Show Garden" here in Arcadia, originally part of the famous "Lucky Baldwin Rancho", provides a perfect setting for our Iris and Hemerocallis plantings.

Paths wind among the rare old Englemann oaks, whose shade provides an ideal home for our lovely Louisiana Iris, and in the half-shade you will find a very complete planting of Hemerocallis. The Bearded Iris are here given their "Place-in-the-Sun"—out in the open, in great drifts of color.

We have "open house" every spring and hundreds come each year to see this wonderful display of color.

MILLIKEN IRIS

In the summer of 1948 we moved our entire stock of iris and daylily plants out to our new 22-acre field which is located in the heart of the famous Pomona Valley where many Nurseries and Seed Companies have their growing grounds. Here the soil is deep and rich, and even we were surprised at the size which our year-old plants attained. We were proud of the stock which we sent out last season, and this season much of it looks even better.

CALIFORNIA GROWN IRIS ARE HARDY

We are often asked if MILLIKEN IRIS are hardy in cold sections of the country. With the exception of a few varieties which we have listed as tender, our Iris are PERFECTLY HARDY in all parts of the country. MILLIKEN IRIS are unconditionally GUARANTEED to be true to name, and to grow in your garden.

SHIPPING TIME: Bearded irises can be shipped any time after June 1st to suit your convenience.

POSTAGE: We prepay postage anywhere on orders amounting to \$3.00 and over, except permanent labels, which are sent prepaid according to rate schedule opposite. On orders of less than \$3.00 add 50 cents to cover postage packing.

MILLIKEN

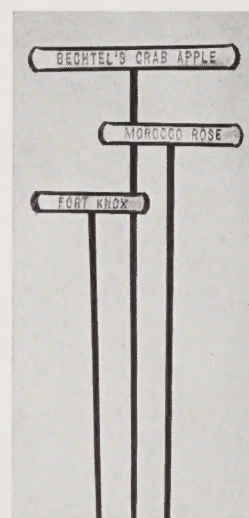

New Permanent Label

This is the finest permanent garden label on the market. The name plate is an aluminum tape $\frac{1}{2}$ inch wide with raised letters. The holder is spot-welded to a heavy galvanized iron wire 30 inches in length and both holder and wire stake are finished in a durable dark green lacquer. Not conspicuous in the garden but easily read at a distance of 10 feet.

We believe this is an ideal label because it is always in a position easy to read and because it is entirely weather-proof. Simply send us the names of the irises or other plants for which you desire labels.

IRISES

FOR

YOUR

GARDEN

CHINA
MAID

FOR IRIS, the Greek Goddess of the Rainbow, these lovely spring flowers were named. With their beautiful green foliage, every color of the rainbow is represented from the fairest pinks to deep ruby red; luscious peach tones to deepest orange; pure white, palest yellows to rich deep gold; blues of every hue, and violets—from daintily tinted mauves to the blackest purples.

Every garden, no matter how small, should contain at least a few plants of iris, and for large gardens there is no other flower to equal the iris for color and beauty in the early spring.

There is no secret in growing iris—the following simple suggestions will insure success, and you will be more than repaid when the next iris-time comes around:

1. Select a sunny, well drained location for your iris planting.
2. Do not plant too deeply—the rhizome should be just below the surface of the ground. Be sure the roots are firmed in the ground securely.
3. Keep well watered until the plants are established.
4. Fertilize lightly at least twice a year with a good commercial fertilizer, or well-decomposed manure, but be sure this does not come in direct contact with the rhizome—it is the roots which need the food.
5. Divide and transplant iris every three years to insure maintaining good sized flowers and abundant bloom.

TIME OF SHIPMENT: We start shipping in June and continue until late fall. For the colder sections of the country we recommend June, July and August for planting as this gives the new plants a chance to become well-rooted before cold weather.

For warmer sections, such as Arizona, Texas, California and the southern states very successful plantings are made as late as October and early November.

Fantasy, which was introduced last year, is acknowledged to be one of Mr. Hall's finest. It is a blending of orchid-pink and rose. The flowers are well formed, of better than medium size and are borne on well branched stems. 2½ to 3 ft. \$15.00

FATHER'S DAY (Milliken)

PERU (Milliken)

A springtime favorite in our garden every year. This lovely large powder-blue iris is alone in its color class. MINIATURES *From Iris Fairyland*

These miniature iris are indeed fairy-like flowers. The flower stems of this group of iris are small and wiry, and branch beautifully, carrying a myriad of tiny perfect iris blossoms atop their 15- to 20-inch stems. The foliage is in proportion to the flowers and is short and compact. For an airy touch in the garden scatter these miniatures around shrubbery, in the border, by the pool, or along the garden paths. You will adore them for flower arrangements. All perfectly hardy. They bloom along with the intermediates.

ONCOBREDS

For those who like the unusual this entire group of iris will be of special interest. They are the result of crossing the oncocyclus (natives of Iran), with some of our own bearded iris. The rare beauty of the oncocyclus has been preserved to a marked degree, and increased vigor and hardiness have been secured from these crossings.

All of them will grow well in California and in mild climates, and many have proven absolutely hardy in cold sections. They require good drainage, full sun, and a light protective covering in cold climates.

AZIM (C. G. White)

An olive-buff, excellent in flower arrangements. 2½ ft. \$1.50; 3 for \$3.75

JOPPA PARROT (C. G. White)

Here is an oncobred which almost defies description. The ground color of the falls is honey-beige, entirely covered with streaks of cinnamon, violet and mahogany. The standards are pale violet heavily veined with purple. The effect is most striking. The form of the flower is extraordinarily lovely. The standards are completely closed, and the falls curve under, forming a complete globe. Outstanding is the extra wide cinnamon beard. Vigorous, but hardiness is not known. 2½ ft. \$6.00

KISH (C. G. White)

A delightful free flowering comparatively small iris. The standards are near white, lightly veined with violet; the falls are veined and closely dotted with violet. A dull maroon patch at the end of the beard adds charm to this flower. 1½ ft. See illustration below. \$1.00; 3 for \$2.50

MOZO (C. G. White)

The ground color is creamy yellow, and both standards and falls are strikingly veined in bronze red. The falls are darker because of closer veinings. Hardy. 2½ ft. 75c; 3 for \$2.00

MUSTAPHA (C. G. White)

The maroon falls flare which is rather exceptional for an oncobred. Small velvety signal patch. The standards are taupe-grey and lavender. 75c; 3 for \$2.00

MYOMY (C. G. White)

An exceptionally beautiful iris. Medium sized white flowers are white with edges veined and dotted with rosy purple. A sharply pointed dark purple signal patch at the end of the beard points downward into the clear white central part of the fall. The whole flower seems to have a pinkish tinge. 2 ft. See illustration below. \$1.50; 3 for \$3.75

NEAR EAST (C. G. White)

This is different in its coloring from most of the oncos. The ground color is cream yellow which is sprinkled over both standards and falls with maroon dots. The falls flare almost horizontally and have a spread of about 4½ inches. Hardy. 2 ft. \$1.50

NELSON OF HILLY (C. G. White)

One of the most beautiful of this lovely group. The standards are white with a delicate bluish-lavender cast, and the cream colored falls which start at the haft with the idea of being horizontal change their mind midway and turn downward, are beautifully peppered with cinnamon and purple minute dots. \$1.00; 3 for \$2.50

\$1.00; 3 for \$2.50; 10 for \$7.00

YARKAND (C. G. White)

A wonderful symphony of violet. The Wisteria violet standards are heavily veined with dark-violet, while the deeply colored falls are even more deeply etched and veined with the deepest purple. A dark beard and almost black signal patch add still more depth to this truly remarkable iris. We hope it will prove hardy everywhere, but we have not received enough information to say as yet whether it will stand severe cold or not. 2 ft. See illustration.

\$3.50; 3 for \$9.00

YOUNG APRIL (C. G. White)

As a cut flower it is indeed a gem. The standards are a bright violet rather distinctly veined and the falls are a deeper violet, veined with blackish purple, and flushed with brown. An early bloomer. 1 ft.

50c; 3 for \$1.25; 12 for \$4.50

ORDER SHEET—Continued

[illegible]

Spurias

The Spurias, sometimes called "Butterfly Iris", resemble the Dutch irises which are extensively used by florists, but the flowers are larger, and numerous blossoms are borne on the three- to four-foot stalks, making a very showy display in the garden, and are superb as cut flowers, as they are not as fragile as the bearded iris and keep for days. The color range is wide, ranging from near-white and creamy-yellow to a deep golden yellow, and from lovely old-gold shades down to a deep golden brown. There are lavender-blues and true blues, and a mixed planting is indeed a very beautiful sight. The browns are quite new and unusually interesting.

Spurias require very little care, and can be left in a permanent location, so should be given room in which to grow. They thrive in full sun, or partial shade, and do best if kept well watered in the early spring and throughout the blooming season. We recommend planting in the fall, but it is possible to ship early in the spring. Keep very moist until established. Perfectly hardy, they are very worthwhile additions to any garden. Spurias bloom at the same time as the late flowering bearded iris.

The most outstanding of the famous Abbeville irises. It is a very deep velvety red with a sharply defined gold beard. It blooms freely, often having three open flowers on a single stem. The flowers open flat and are firmly built. Its name indicates the darkness which is unmatched by any other iris in this group. 1½ ft. See illustration. **\$2.00**

JEUNE FILLE (Ruth Dormon)

Like a dainty little girl in her first lovely frilled white dress, this exquisite, pure white Louisiana stands out in a group of this variety of iris, all of which are lovely. **\$2.00; 3 for \$5.00**

Louisiana Iris

"Are there any others with such beauty of foliage, such gypsy grace of curving stem and whimsically turned bud? What other iris tips a flower to the side and looks one full in the face?"—Caroline Dormon.

The color range of this enchanting group of iris is large, ranging from the purest white through pale pinks to rose, coral tones, soft yellows, rust and copper, blues of every shade, rich old reds, to the blackest purples and wine colors.

The shape and size of the flowers vary with the variety, those of the famous Abbeville type (see cut of Haile Selassie) are flat and resemble a Japanese iris, while others are crisp and starched looking.

They are very beautiful in the garden, but to really fall in love with them, cut some and take into the house. A single flower stalk, or a dozen, it makes no difference, the result is always the same—entrancingly lovely. No other iris has their charm—they are in a class by themselves.

Louisiana iris are as easy to grow as bearded iris, although they prefer semi-shade, a soil enriched with plenty of humus, and, of course, should be well watered prior to, and during the blooming period. We make shipment in the fall.

There is no denying it, taken as a group or as a single flower, these beautiful iris from the swamps and bayous of the south, and which seem perfectly at home here with us, created a sensation in our gardens last spring. **\$5.00; 3 for \$12.50**

CRESTED IRIS DARJEELING

TAMARA CAPISTRANO
COLONIAL DAME

RED ROCK CANYON
PARTY GOWN

Like an intermezzo in the Spring-Summer symphony, the serene and lovely daylilies come into bloom, after the pomp and splendor of the iris season. A far cry from the old-fashioned daylilies of our grandmother's garden, these delightful flowers are now available in almost every shade of yellow, from the palest cream to deep chrome-yellow; from lightest apricot to deepest orange. The "Pinks" which have been developed from *Fulva rosea*, a wild form from China, which is commercially known as *Rosalind*, are rapidly becoming very popular. The deep reds, reddish-browns and mahogany colored blossoms as well as the purple and wine shades are all rich and have great garden value.

Extensive work on the part of the hybridizers has given us daylilies of exceptional form and texture, as well as the many new colors. Some of the new varieties have wide petals, heavily creped and ruffled, which flare back, giving a pleasing wide-open appearance. Sometimes the petals and sepals are twisted and curled, while others are very symmetrical in appearance. The size of the flowers vary from tiny blossoms which are borne in a cluster or shower, to large individual flowers which measure seven to nine inches across. The dwarfs average about a foot in height, while some of the giants shoot up to almost six feet.

Daylilies are one of the most satisfactory perennials and grow well in almost any location. They are lovely in the border, and are particularly well adapted to naturalizing, as they do well in half-shade. Ordinary garden soil, enriched with humus, and kept well watered prior to and during the blooming season will produce an abundance of bloom. Varieties can be selected to stretch the season from spring to early autumn.

Hemerocallis can be left undisturbed for many years but much better blossoms are obtained by dividing and transplanting every third year.

TIME OF SHIPMENT: We can ship daylilies at any time of the year when your conditions will allow you to plant them.

GARNET ROBE (Milliken)

We are very proud of this daylily—introduced two years ago, it has already been acclaimed by many competent persons, among them Doctor Philip G. Corliss, noted authority on Hemerocallis, as the best red yet introduced. Garnet Robe is a deep garnet-red—it glows like an ember, but is also rich and velvety. This deep coloring, which does not fade, runs to within an inch of the bottom of the throat, the lower inch being greenish yellow. The flower is of medium size (5 inches) and opens wide. Vigorous and evergreen. 3 ft. **\$20.00**

HIGH NOON (Milliken)

A beautiful deep rich cadmium yellow self. Both the petals and sepals are thick and recurved, and both have deeply ruffled edges. The color of this daylily is a very brilliant yellow—and the name "High Noon" was given to this particular flower because at high noon it stands up to the brightest sun with an almost defiant staunchness to outdo the sun itself, and in fact it does because long after the sun has gone down, this beautiful new hemerocallis is still fresh and lovely to behold. The flowers measure 4½ to 5 inches across. 3 feet. **\$20.00**

HONEY REDHEAD (Nesmith)

A brownish-red flaring flower with borders of light yellow. Unusually bright for a coloring so deep. Deciduous. **\$2.00; 3 for \$5.00**

JUBILEE (Stout)

The flowers are large and are borne on well-branched, 3½-foot scapes. The color is light cadmium except for the conspicuous eye zone of English red. We do not recommend this for the colder sections of the country, however, as it has proved rather tender at the New York Botanical Gardens but it should do well all through the South and along the Pacific Coast. Evergreen. **\$1.00; 3 for \$2.50**

THERON (Stout)

Certainly one of the most deeply colored daylilies. On cloudy days the flowers look almost black but the color is really a very dark red. The throat is pale orange becoming greenish in its deep and narrowed portion. The flower is large, open, with the petals twisting slightly at their tips. 30 in. Deciduous. 75c; 3 for \$2.00

TRIUMPH (Stout)

A rich orange flower of very attractive shape and about five inches in diameter. The broad petals, waving along the edge, are curved back while the intervening narrower sepals spread forward, giving the flower an enthusiastic, smiling expression. Summer. Deciduous. 3½ ft. \$1.00; 3 for \$2.50; 10 for \$7.50

TYLER RED (Tyler)

An open deep mahogany-red. The flowers are large, the plant vigorous and evergreen. We think that it is destined to become more and more popular. 2½ to 3 ft. \$1.00; 3 for \$2.50; 10 for \$7.50

VALIANT (Cook)

We will place this at the top of the orange daylilies which we have seen so far. The flowers are open and full, the petals wide and of fine substance. The color uniform and permanent. Deciduous. 3½ ft. \$6.00

VICTORY TAIERHCHWANG (Traub)

A wine colored daylily, originated by Dr. Traub, which makes a splendid display in the garden. The plant is very floriferous, flowers of medium size. Evergreen. 2 ft. 75c; 3 for \$2.00

VULCAN (Stout)

A striking ruffled deep maroon, 4-inch flower with a golden orange throat. Very popular. Evergreen. 2½ ft. \$1.00; 3 for \$2.50

WAU-BUN (Stout)

An excellent evergreen variety with broad petals of cadmium-yellow, the outer half flushed with red. 30 inches. Summer. 75c; 3 for \$2.00

WEKIWA (Traub)

A bright orange-red (Brazil red) of medium size, 5½ inches, with an inconspicuous darker red, "garnet red", eye zone and an orange-yellow, "capucine-yellow", throat. Deciduous. \$1.50; 3 for \$3.75

WINSOME (Yeld)

Delightful wide open small blossoms of pale creamy yellow. Fragrant. 30 inches. Early summer. Deciduous. \$1.00; 3 for \$2.50
